

LESSONS LEARNED AT SCHOOL

Our schools teach ALL SUBJECTS in English!

Government schools only teach in the Hindi language or a local language, preparing kids for the past. Past jobs and past ways of thinking. WE'RE LOOKING TO THE FUTURE. All our subjects are taught in English, including high-level math like trigonometry (pictured above)! We're preparing our students for the current global economy and the brightest possible futures.

WHY IS THAT A BIG DEAL? Many programs for underprivileged kids living in extreme poverty in India never go beyond mere literacy, which is not enough to improve their future!

Our students are **FULLY PREPARED** for college and careers, just like students in the US.

**NONE OF THIS IS POSSIBLE WITHOUT A SCHOOL.
OUR SCHOOLS MAKE A DIFFERENCE**
